# GOOLE STREET MAGIC

MIND CONTROL

## MIND CONTROL 'STREET MAGIC'

**Freak out family or friends with your ability to perform 'street magic' by predicting in advance the name of the street they will choose with this easy to learn 'street magic' trick.**

This activity uses the four cards supplied. Your audience member (or spectator) selects one of the cards by tapping it on the back. When the cards are turned face up the card they selected is revealed to have the words **\*\*You will choose this card\*\*** printed on the front of it.

**Read on to learn the secret...**

## HOW THE MAGIC WORKS #1

**1st (secretly) check out if your spectator is left or right handed.**

Place the four 'street magic' playing cards face down in a row on a table in front of your spectator.

Ensure that the card with **\*\* You will choose this card\*\*** printed on the front is placed in position number 2 for right handed spectators and at position number 3 for left handed spectators.

**Now ask your spectator to tap the back of one of the cards...**

If you have correctly placed the cards according to which hand your spectator is 95 % will tap the back of the card with **\*\* You will choose this card\*\*** printed on it.

## HOW THE MAGIC WORKS #2

**Slide their chosen card face down towards them**

Turn over the other cards one by one revealing the names of streets in Goole. Saying something like "I knew you'd choose that card" ask them to now turn over their chosen card and reveal your brilliance. Ta-dah!

**If they tap the back of another card all is not lost...**

Simply ask them to tap the back of a second card. If this is the card you'd like them to choose hold them both and ask "Which would you like me to drop?" If they select the one you want; them drop it face down in front of them. If its the other drop it aside leaving the one you want them to choose...

**Practice and rehearse...**

Have fun amazing people with your new found skills in mind control.

Good luck!
